

AgriGENESIS X Institute at a glance

FOOD SYSTEMS INTELLIGENCE, RESEARCH AND ENGINEERING

AgriGENESIS X Institute (AGX) is being established as an independent nonprofit institution for agriculture and food systems. It is building the intelligence, research and engineering that turn agricultural knowledge into food systems that can be tested, financed and built, starting in Africa. AGX was founded by Nadia Zeine.

QUICK FACTS

NAME	AgriGENESIS X Institute (AGX)
TYPE	Institution for agriculture and food systems, being established as an independent nonprofit
LOCATIONS	The Netherlands and Ghana
FOCUS	Food systems intelligence, research and engineering, starting in Africa

THREE PROGRAMS

PROGRAM I

Open Intelligence Commons

One trusted, open evidence environment for agriculture and food systems decisions.

PROGRAM II

Integrated Agricultural Industrial Corridor (IAIC) Blueprint

The architecture connecting production, processing, logistics, markets and capital in Africa's integrated agro-industrial corridors.

PROGRAM III

Industrial Food Infrastructure Architecture

Engineering principles and reference systems for food infrastructure that can be reused and tested before deployment.

FOOD SYSTEMS BLUEPRINT LAB

A recurring working platform where research, industry, development finance and public institutions test design conditions behind Africa's food future, starting from prepared evidence. The first edition is in preparation.

Status. AGX is in its establishment phase. The programs described here are architecture and capability under construction, with outcomes stated as intended. AGX does not invest in, own or operate projects. Nothing here is an offer or advice.
